TotalData

Collected and Curated Data Excellence

For growth-focused data aggregators, researchers and businesses across different industries, it's not just about collecting data; it's about getting empowered with the foresight to make informed decisions. But data is great only if it doesn't have issues such as poor quality, lacks real-time validation, incurs hefty costs and resource overheads, or fails to comply with regulations. **So, how can you solve these time-consuming data operations challenges with low turn-around time?**

Introducing TotalData: A Suite of Automated, Curated & Modular Data Services

Damco's **TotalData** automates your entire data journey- collection, verification, monitoring, processing, and reporting through its highly flexible and scalable modules. This end-to-end Artificial Intelligence (AI)/Machine Learning (ML) and Robotic Process Automation (RPA)-powered solution, underpinned by human-in-the-loop (HITL) approach, delivers high-quality, secure data and insights for aggregators, researchers, and businesses of all sizes.

Start Your Data Excellence Journey With Uniquely Designed Modular Services

TotalData

TotalCollect

Data Sources		Data Extraction
Open Data	Web Data	RPA · AI · ML
Private Data	.Doc	**Automation Tech**
CMS	.PDf	Skilled Data Professional
DAM	.XML	

TotalValidate

Structured Data			Validation and Curation	
JSON	XLSR	CSV	Web/Intenet based	Through Calling
Jason	XLSR	CSV		

TotalProcess

Data Delivery In Desired Format

CMS	CRM	.PDF
RDBMS	.Doc	.XML

TotalAnalysis

Insights Delivery Through Desired Technology

Power BI · tableau SOFTWARE · COGNOS · pentaho · Qlik

and more...

Each of the modular services is specifically designed to leverage next-gen technologies to help you navigate the complexities of data collection, aggregation, verification, continuous data monitoring and reporting.

TotalCollect

Extract business relevant, accurate, and complete data from diverse commercial and public data sources as well as from your existing database.

TotalValidate

Validate and curate the newly collected data or existing database through HITL approach to minimize inconsistency, errors and improve relevancy.

TotalProcess

Get the validated, enriched, cleansed, formatted and converted as per business rules to get high quality desired data in the required formats.

TotalAnalysis

Add a layer AI/ML powered predictive analytics and BI dashboard capabilities on the high-quality datasets to get valuable insights for informed decision-making.

Why TotalData?

80% Improved Data Collection **Turn-around-time** with Automation

60%+ Reduction in **Operational Cost**

Strict **Adherence** to Data Protection Regulations

99%+ Accuracy of the Collected Data

Improved **Quality** of Collected Data

Greater **Data Security & Confidentiality**

24X7 **Access to** Technology & Highly skilled Data Professionals

Enhanced Control Over Data Collection Operation

Seamless & Highly Accurate Data Collection: **Total**Data's Next-Gen Features

Ease of Customization, Flexibility, & Scalability: Tailor **Total**Data to match your unique business criteria, industry-specific requirements while scaling it up & down to accommodate the dynamic data volumes.

Advanced Intelligent Technology Integration: Enhance data accuracy, quality, and reliability through AI/ML and RPA-powered automated and intelligent data collection and processing.

Ease of Integration with Existing Systems: Expedite data collection processes by breaking down data silos through seamless integration of **Total**Data with your existing infrastructure, disparate data sources, and systems.

Predictive Analytics & Insights: Gain holistic insights and recommendations for informed-decision making through data-driven intelligence derived from collated data.

Intelligent Reporting: Harness real-time reporting capabilities to access up-to-date and latest data for highly informed decision-making.

User-friendly Interface: Simplify data collection and retrieval process through a highly intuitive and user-friendly interface.

Robust Security Measures & Compliance Adherence: Mitigate data security issues and maintain data confidentiality and integrity through robust security measures and strict adherence to industry regulations and compliances.

Ongoing Support & Training: Empower your teams to leverage the optimal potential of **Total**Data through regular support and training services and keep them up-to-date on best practices and new features.

Why Damco?

We are a Big Small Company
Big in terms of wide coverage of technology, maturity of processes and complexity of projects delivered; small in terms of less hierarchy, unmatched attention and agility

We are Global
2500+ strong team across US, UK, Luxembourg, Middle East, Caribbean and India.

More Than Two Decades of Experience
Demonstrated 28+ years of experience in delivering IT services & solutions to customers worldwide.

And Flexible
Offer flexible engagement models. Teams can be made available onsite, off-site, offshore or in a hybrid engagement.

Strong Experience in Both Legacy and Latest
With expertise in emerging as well as legacy technologies, we deliver best-suited solutions appropriate for your business needs.

Focused On Quality
Commitment to Quality and Established Engineering Processes, ISO & CMMI certified organization.

With Best-In-Class Expertise
Functional competence and technology expertise for a broad range of industries and platforms

Ensuring Success. Always
We are committed to partner-centric business model building sustainable relationships taking full ownership of the engagement success

About Damco

Founded in 1996, Damco Solutions is a trusted technology partner for businesses from different industry verticals across the world. With over two-and-half decades of technology experience combined with immaculate execution capabilities and an unwavering focus on customer success, Damco has empowered businesses ranging from startups to Fortune 500 clients with its tech-integrated solutions. Headquartered in Plainsboro, New Jersey, Damco is supported by multiple state-of the-art global delivery centers located in the USA, UK, UAE, Luxembourg, and India.
